Hardware Resources Releases Sharp New “No Wiggle” Knife Pullout

The “No Wiggle” Knife Pullout reduces kitchen clutter while preserving blades.

(BOSSIER CITY, LOUISIANA–DECEMBER 28, 2020)---Hardware Resources announced today that it recently launched the latest in their “No Wiggle” series of cabinet pullouts, the “No Wiggle” Knife Pullout. This pullout features an innovative magnetic knife bar cleverly integrated into the pullout.

The strong magnetic knife bar is embedded into the wood, ensuring minimal contact with each individual knife’s cutting edge to preserve the knife’s sharpness. The double-sided magnetic knife bar offers a total of 31-1/2” of storage, which will accommodate a full knife set. An additional insert in the back of the unit holds small paring or steak knives.

This knife pullout is built on Hardware Resources’ patented “No Wiggle” technology, eliminating the side-to-side movement and sag commonly seen in other brands of pullouts. Additionally, the unit ships fully assembled for quick and easy installation and features premium soft-close undermount slides.

“Traditional knife blocks dull blades over time whereas magnetic strips minimize blade contact, keeping knives sharper. Sharper knives are the key to safer and more effective cutting. Plus, good knives are expensive; this innovative pullout

protects that investment,” stated Marisa Sanchez, Senior Product Manager for Organizers The knife pullout is available in either a 5" or 8" width. Both pullouts include a sturdy plastic cutting board with its own designated storage area, easily storing all prep tools together in one single unit. The thick cutting board features rubber feet and a drip groove, all while being dishwasher safe. Finally, the 8" pullout comes with three stainless-steel canisters for even more cooking utensil storage.

“Hardware Resources continues to lead the way in helping home remodelers design the perfectly organized chef’s kitchen. We are proud to continue to keep kitchen workspaces conveniently designed and clutter free,” said Sanchez.

The Pullout’s magnetic bar is encased in wood for a sharp look.

Customers interested in learning more or placing an order for a pullout should reach out to a Hardware Resources representative or visit HardwareResources.com.
